*Re: Hydrotest Water Treatment and Discharge*

Dear Mr. Sellinger:

I would like to take this opportunity to express ARCO Pipe Line Company's appreciation regarding the successful completion of the referenced project. As you are well aware, there are few alternatives for the treatment and disposal of nearly 60,000 barrels of contaminated water from a facility without water treatment capabilities. In my opinion, your portable water treatment system is the most effective means of addressing these types of waste management problems. The ability of your system to treat and meet NPDES discharge limits while maintaining a high daily throughput rate was a key to your success. Furthermore, it goes without saying that reducing our potential cost exposure by approximately 75% also contributed to your success.

Again, we appreciate your assistance with this project and we hope to take advantage of your services on similar projects.

Sincerely,
