Signal Hill, California 90806

March 13, 2002

Dear Steve:

I would like to take this opportunity to thank you and Envent for the great work you have done for the Department of Water and Power over the course of this last 18 months. The work that you have performed on the Harbor Recycled Water Pipeline has been invaluable in keeping the project on track

The volume and varied constituents of the waste water that you have treated has been enormous, but your help and experience has paid off well with the successful completion of the project. Your field crew was well prepared for the unexpected and was able to modify the treatment system as necessary to accommodate the various inputs and meet all regulatory discharge requirements.

Thanks again for a successful project. It has been a pleasure to work with such an outstanding group of people.

Sincerely,

[Redacted Signature]
