Mr. Steve Sellinger
Envent Corporation
2187 Walnut Avenue
Signal Hill, CA 90806

Dear Mr. Sellinger:

I wanted to express our appreciation to you and your staff for managing the re-design, engineering, and equipment fabrication & installation assistance on our wastewater treatment facility. We now feel this facility is one of the finest off-site treatment plants anywhere. The re-design allows us to treat a greater variety of petroleum contaminated wastewaters at a larger throughput utilizing Envents dissolved air flotation technology and advanced oxidation systems. As a result we recently received an NPDES permit which allows us to discharge treated water into the storm drain.

Our customers, including major oil companies and the US military, are very pleased with the facility.

Thank you, and please express our appreciation to your staff.

Sincerely,

A large black rectangular redaction box covering the signature of the sender.

Plant Manager
