Subject: Envent Corporation – Reference of Services

This letter is a recommendation for Envent Corporation's on-site vapor control, tank degassing and water treatment services. We have been using Envent Corporation for over 10 years and they have always responded, whether the project is scheduled or an emergency. Their state of the art equipment is definitely the best in the business and they always seem to be improving it. All of their operators are knowledgeable and problem solvers. They have a good working relationship with agencies and can help in obtaining permits when need be. Their safety flawless safety record resulted in a 2004 Safe Contractor of the Year award. We have had a successful relationship with not a single safety or environmental incident. They have always responded to our many emergencies and performed flawlessly.

Envent is a top tier company and highly recommended.

Sincerely,
