IN REPLY REFER TO:

Pol. 000704-415-2008

Mr. Steve M. Sellinger
Envent Corporation
2398 California Avenue
Signal Hill, Ca. 90755

Dear Mr. Sellinger,

It is the policy of the State Compensation Insurance Fund to recognize the safety efforts of our policyholders through our safety award program.

As you are aware, a safety award was presented to ENVENT CORPORATION on March 16, 2009 that recognized the company for its proactive attitude toward safety and its outstanding workers' compensation loss ratio for 2002 through 2008.

The presentation of a safety award is at the discretion of the assigned loss control representative and must adhere to specific criteria.

I based my selection on the fact that your company has had outstanding loss ratios with the State Fund dating back to 2002. In fact, except for an incident that occurred in 2001, this clean record actually dates back to 1996.

Further, having only been assigned your account since November, I relied on the comments made by the previous loss control consultant in his service reports. He indicated it was his opinion that there was a proactive attitude toward safety at Envent and that his safety contacts were receptive to his visits and had followed through on his recommendations.

Also, a review of your company's website (i.e. Safety & Compliance) following my initial meeting with Ms. Fields gave me the impression that Envent is highly regarded in a closely regulated industry.

I would once again like to congratulate your organization and thank you for being a long term policyholder with the State Compensation Insurance Fund. Keep up the good work!

Sincerely,

Loss Control Consultant
