

EC-250

CARBON SCRUBBER

Envent's EC-250 is our smallest, most economical carbon scrubber and is great for low flows and low concentrations of organic vapor. We offer them to our customers as an economical alternative when there is no need for a large volume of carbon to do odor control. They have a small foot print and are easy to move around.

EC-250 SPECIFICATIONS

RATED FLOW

0 – 100 SCFM Maximum
Flow may be reduced based on piping restrictions

CONNECTION TYPE

Inlet 2 in. Female Cam
Outlet 2 in. Male Cam

MEDIA TYPE
