

## 12 x 40 COCONUT SHELL BASED (EWCOC1240)

EWCOC1240 is activated carbon granules made from select coconut shells. It is used for a wide range of liquid filtration and purification systems. These carbon systems are most notably used for the removal of volatile organic compound from contaminated wastewater stream. EWCOC1240 provides an alternative to coal based activated carbons with less ash content, minimal pressure loss, a large surface area, and an effective adsorbing capacity.
